1881

This little sampler was bought in France. It's an old school sampler, stitched in cross stitch on coarse even weave.

It is un-marked, and sadly very damaged.

I looked at the back of it to get an idea of where the missing stitches were, and completed the numerals by copying them from another old French sampler.

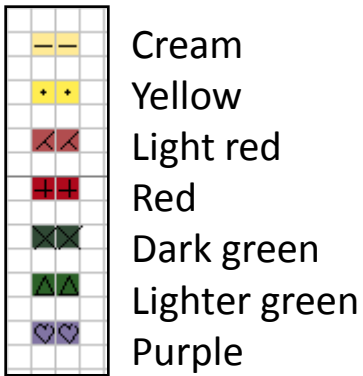

85 x 89 stitches

15.4 x 16 cm on 14 ct

The colours are just an idea.

You can make the sampler in one solid, or variegated floss.

Or in any other colour combination you like.

As you can see the back of the sampler kept it's bold colours.
